

On Monday, Feb. 27th, I had the honor of submitting the specimens, *in situ* and intact, to Dr. Pilsbry and Mr. Vanatta, of the Academy of Natural Sciences, for verification, and they confirmed the discovery.

As no record of observed parasitism in America of *Glochidia* has been made in any scientific journal that I am aware of, it was a great pleasure to find them living, and confirm the observations made in Europe.

The fish were taken from the most eastern of the three connected ponds at Westville, N. J.

---

NOTES.

---

MARRATT AND THE CONCHOLOGIA ICONICA.—In the February NAUTILUS, p. 120, in the extract from "The Museums Journal," concerning the late F. P. Marratt, it is stated that he was the author of the monograph on *Oliva* in Reeve's "Conchologia Iconica." This is an error which might be corrected if you think it necessary.

When Lovell Reeve wrote that monograph in 1850, Marratt was unknown as a conchologist.

Of the "Conchologia Iconica" Reeve was author of Vols. I.—XIV., and as far as *Tornatella* in Vol. XV. The rest of that volume, commencing with *Pyramidella* to the end, and Vols. XVI.—XX. were the work of the late G. B. Sowerby.—EDGAR A. SMITH, British Museum (Natural History).

---

NOTE ON THE GENUS APOREMA DALL—This group, of which *Pholadonya arata* Verrill is the type was named in 1903. But I am informed that *Aporema* was used in 1890, by Scudder, for an insect, and the molluscan genus therefore requires a new name. I propose for it *Panacca*.—WM. H. DALL.

---

NOTE ON TRICHODINA ANCEY.—Inasmuch as the name *Trichodina*, proposed by Ancey in 1888 for an Achatinoid land shell (cf. Man. Conch. pt. 67, p. 182) was used in 1830 by Ehrenberg for a genus of Foraminifera, I would propose that it be replaced by *Petriola*.—WM. H. DALL.
